

MULTINANO

Screen Protector & Back Skin

About History

A group of creative and dynamic young people started their activity in this industry in 2015, driven by their concerns about the screen protector industry.

Despite the ups and downs it has faced over the years, **Multi Nano** Company has managed to achieve its desired goals in this industry.

One of the main goals of **Multi Nano** Company from the very beginning has been the production of high-quality screen protectors in a wide variety, as well as the possibility of personalizing them. They have succeeded in creating this possibility for a wide range of products, including phone and laptop brands, which is considered a very important matter.

Competitive **Advantage**

The largest manufacturer of screen protectors
and cover stickers in the Middle East

Exclusive design for each device

Best quality

Amazing Nanotechnology

It is better to first have a simple definition of **nanotechnology**.

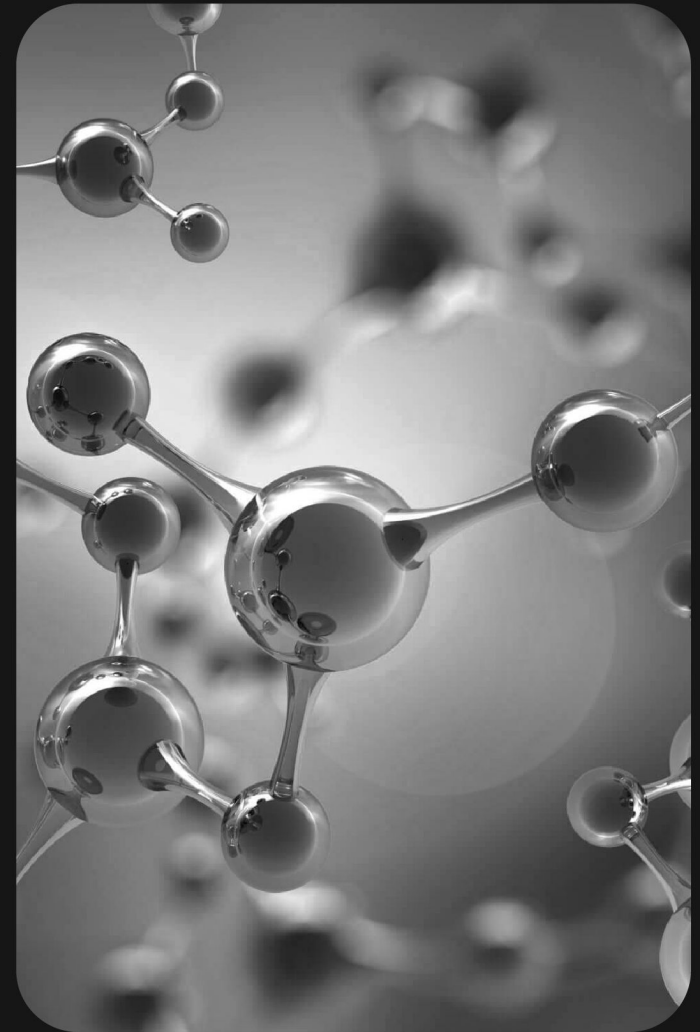

Nanotechnology includes research and technologies in which changes and optimizations are made at the scale of about 1 to 100 nanometers.

Nanotechnology enables the creation and use of structures that have new and unique properties due to their small size.

If we want to take a deeper look, we can say that **nanotechnology** works based on the ability to make changes at atomic dimensions.

The **Multi Nano Company** has tried to produce and supply suitable screen protectors using **nanotechnology**.

The use of **nanotechnology** in screen protectors has given these products unique features, including anti-impact thickness and high flexibility. Bringing these aspects together has made Multi Nano Company products welcomed by many customers.
